CHAMPION, (Alberta) THURSDAY, MAR. 4, 1926

SAVOY CAFE

Having purchased the above Cafe from J. Maritain I solicit the continuance of the patronage this Cafe has enjoyed.

The restaurant will be thoroughly overhauled and patrons may rely on the very best service possible at very reasonable prices.

Soliciting your patronage
Leo. M. Roberts.

Dr. R. R. McIntyre DENTIST

714 Herald Block, Calgary.
Will be at Champion all day Monday each week.
Appointments may be arranged at Moffatt's Hardware.

J. FRED SCOTT LL.B.

Barrister, Solicitor, Notary Public, of 213 Lancaster Building Calgary. Will be in Champion every Thursday afternoon and evening, in old Municipal office.

Champin Lodge
No. 84
A. F. & A. M.
G. R. A.

Meets second Thursday in each month. Visiting brethren welcome.
CHAS. MCLEAN, E. E. CRAWFORD, W. M.

Rink Season

May Be Over

The rink was closed temporarily, at least, at the end of the month, and to judge by the weather it may well be regarded as permanent. The season has not been a favorable one for either curling or skating and a carnival was simply out of the question as far as Champion was concerned.

O.E.S. Card Party And Dance

The last card party and dance for the season, under the auspices of the O. E. S., will be held in Campbell's hall on Monday, March 8th, and every effort is being made to make this the best evening of the season. Lunch will be served as usual and good music and good prizes are assured. Admission 75c. Cards start at 8 o'clock, sharp.

Mrs. B. Hammel returned from an extended visit to Staveland during the week.

It is estimated by the Department of Agriculture that the beekeepers of Canada gather 21,000,000 pounds of honey a year.

A new mild-winter record for Alberta was set up at Taber, in the vicinity of Lethbridge, when Geo. Hedell, a farmer, seeded a five-acre plot of alfalfa on February 8.

An effort to colonize the Mendenhall Ranch, of 10,000 acres near Magrath, in southern Alberta, will be made, according to an announcement made in Lethbridge.

The production of gold in Canada rose from 1,525,382 fine ounces valued at \$31,532,443 in 1921 to 1,730,000 ounces with a value of \$35,708,000 in 1925, according to the Dominion Bureau of Statistics.

Total coal production for 1925 in Alberta was 5,882,391 tons, an increase of 670,000 tons over 1924, according to the annual report of the provincial mines branch. The report also shows that 1,148 tons of tar sands were taken from the Waterways district during the year. The total employment in coal mines was 11,175, a decrease of 885 over December of 1924.

Movement of 300,000 tons of Alberta coal to Ontario markets will be undertaken shortly under special arrangements made between the federal government and the governments of Alberta and Ontario. The Alberta government will bear one-third of the actual freight cost of the shipment over and above the 57 a ton rate.

CHURCH BULLETIN

Rev. J. Lee announces the following services for Sunday next, March 7.
11 a.m.—Sunday School.
3 p.m.—Service at Blinn School.
7:30 p.m.—Service at Champion.
Sermon subject "The Saviour of the World." All welcome at these services.

Alex. Park Off

For Scotland

Alex. Park, who has been in charge of the Beaver Lumber Co's yard here since 1920 leaves in a few days for Scotland. Alex has made many friends while residing here and a pleasant journey and a good time in his motherland trip will be the general wish. The Chronicle joins heartily in the good wishes. The recent amalgamation of the Beaver and Stacey lumber yards made the opportunity of getting away Alex, has been looking forward to for some time.

Hospital Vote

Monday, Mar. 15

Look over the list of polls published in this issue and discover where you vote on March 15th. The persons entitled to vote are described in this advertisement so clearly as to leave no doubt in anyone's mind as to whether they are qualified or not.

Institute Meets

Next Tuesday

The March meeting of the Champion W. I. will be held at the parlourage next Tuesday afternoon, at 2:30 o'clock. Rev. J. Lee will give an address on "Irish Notabilities." Roll call response "Irish Jokes." This is a cordial invitation to all ladies in the community. Come and bring a friend.

W. I. Organises

Dramatic Society

The W. I. are preparing a play entitled "And Home Came Ted." Judging from the start the amateurs have made, the public may look forward to something worth while. The proceeds are for the Community Hall funds.

O. E. S. card party and dance Monday night, March 8th.

Mrs. M. A. Theriault left for Calgary on Thursday morning on a business trip.

The Dominion government was sustained by a majority of nine on the vote to adjourn to March 15th.

Richard Latiff had the misfortune to injure his knee seriously on Sunday and is under the doctor's care.

Chapin's Midnight Serenaders were greeted by a small house at Tuesday evening's dance, but rounds contributing to the shortage of dancers.

Walter Harris is again in charge of the repair department of the Ford Garage. Extensive improvements in equipment are to be made which will place the Ford Garage in a class by itself in this line.

This has been an exciting week in oil circles, a strike at the McLeod well in Turner Valley starting the ball rolling. Things have since quieted down considerably.

Saturday March 13

Mr. Lowden, of the
TIP-TOP TAILORS

will be at our store with the latest suit ends; also suit and overcoat models for spring and summer.

Order your suit for Easter now.

B. M. ROBERTS

Now for Spring!

A large assortment of stamped goods just arrived. Lunch cloths, vanity sets, buffet sets, guest's towels, day slips and pillow slips, ladies and children's aprons, glass and tea towels, night gowns, cere centers in all different colors.

Don't overlook my new spring arrivals in dress lengths of rayon, printed and bordered crepes, brochelettes, something new in patterns. Rayon and rayon crepes, also the latest pattern of stripe and bordered gingham, also checks and plaids.

MRS. THERIAULT

The Touch of Spring

Commercial rates on application.

THURSDAY, MARCH 4, 1933

The Municipal Hospital

The Chronicle has been asked to define the reasons for opposition to the municipal hospital by-law. Here they are:

(1) It is unnecessary. Good hospitals are easily available here, train service and every other essential being in evidence.

(2) It is expensive beyond reason. The Municipal District of Harmony furnishes about one hospital patient for each hospital day in the year at a cost of little over \$1000.00 per year. Under the new system the same territory will pay \$4000.00 per year.

(3) If payment to this hospital was not forced through taxation it would be a dismal financial failure. Experience with local hospitals has proved this in very numerous instances.

(4) It necessitates every sick person going to the hospital if any reasonable return for the money expended is to be realized. The average person prefers to be sick at home in any ordinary sickness.

(5) It must ultimately be a waste of money or all medical practitioners will live where the hospital is located. If the people patronize the hospital, the extent they pay for the resident doctor at centres where there is no hospital will suffer and finally there will be no doctors except at hospital centres.

(6) Seventy-five per cent of the ratepayers, in this vicinity, at least, are in no position to pay further taxes. The amount of taxes outstanding at Jan. 1st, is ample evidence of this.

NOTES AND COMMENT.

The number of patients treated at municipal hospitals is pointed to as evidence that such hospitals are a necessity and are popular with the people. It must be borne in mind, however, that under the municipal system the ratepayer's hospital bills are paid in advance and the natural inclination is to try to get some benefit from taxes paid. If a municipal hospital depended upon voluntary patients there would be no municipal hospitals. Local institutions of this kind have rarely been a success.

NEWS NOTES

The Peace River district, 400 miles north-west of Edmonton, has experienced the mildest winter shown in 125 years of records according to J. A. McGregor, general manager of the E. D. and B. C. railway, who states that the ice on the Smoky River went out on December 9, and the ice on the Peace River went out on December 10. According to records which Mr. McGregor has, this occurred once before 125 years ago. In the southern part of the province, in the foothills, ranchers state that it has not been necessary to feed a pound of hay to cattle, who have been able to feed off the range all winter. A small amount of plowing has been done or the

land in certain southern districts.

An average of approximately 100,000 admissions a week was the record of Alberta theatres for 1925, according to the report of the Provincial Secretary in this respect. The total admissions for the year were 5,250,703. The total amusement tax collected was \$193,331.14. The picture censor, Howard Douglas, reports that out of 5,015 reels of film censored, 4,735 were passed without change. Eight were rejected entirely. There were no appeals during the year. The total number of pictures censored was 1,887, of which as stated above, eight were rejected.

A branch line of the E. D. and B. C. north-west of Edmonton is to be started the coming season, provided the legislature approves, according to an announcement made by Hon. V. W. Smith, minister of railways. The line is to run from a point on the E. D. and B. C. near Weylock, towards Fort Assiniboine, and 25 miles will be built this year.

The number of homestead entries in the Edmonton land districts for the first half of February total 65, an increase of 21 over the same month of last year.

New Grain Treatments

Are They Better Than the Old!

(Experimental Farms Note).

Any farmer who would answer the question, "Are the new seed treatments for grain better than old?" must consider the cost of the fungicide, the ease of application and the results already obtained.

Most of the new substances offered for sale have merit, but a few are the best, against which the public must be warned.

One of the most promising fungicides for the control of certain diseases is copper carbonate dust. It has been extensively tested in Western Canada by the Dominion Experimental Farms Branch. Copper carbonate gives good control of wheat blight and covered smut of oats and is recommended for the control of these two diseases.

Two ounces of copper carbonate per bushel is recommended for wheat and three to four ounces for hulls oats.

Farm Lands For Sale

S. 1 of Sec. 90, Tp. 14 R. 23, W. of the 4th M., near Champion, Alberta, (except coal and petroleum).

Tenders for the above land will be received by the undersigned on or before the 10th day of March, 1929, and must be accompanied by an accepted cheque for 5 per cent of the tender.

The farm, which is about 24 miles from Champion, has about 200 acres under cultivation, is all fenced and contains good farming land.

No tender necessarily accepted.

Terms: 1 cash (including deposit balance in 1, 2 and 3 years, with interest at 8 per cent per annum. Further particulars may be obtained from

L. H. Stack, Barrister,
Vulcan, Alberta.

The Savoy Hotel

Is the Most Commodious; the Best Furnished and provides the best Accommodation to the travelling public of any hotel between Calgary and Lethbridge on the Aldersyde Branch.

Special Rates to farmers in the District.

Your Patronage Solicited.

STEAM HEATED

ELECTRIC LIGHTED

Larger quantities will not injure the seed. A good grade of copper carbonate dust manufactured for the purpose should be purchased.

The seed must be coated evenly with a film of dust. An air-tight dusting machine is necessary. An old "daisy" churn serves the purpose well. The seed should not fill more than a third of the churn and the handle should be turned slowly about 100 times for each treatment.

Copper carbonate does not affect the germination of the seed while formalin reduces it. The farmer may dust his seed in the winter before the rush of spring work begins.

For full information and advice regarding seed treatment for smut write the Division of Botany, Central Experimental Farm, Ottawa, Ont., or the Dominion Rust Research Laboratory, Agricultural College, Winnipeg, Man.

WORLD HAPPENINGS
BRIEFLY TOLD

Tentative plans for extension of the flight of the Spanish trans-Atlantic cyclone headed by Comandante Juan Franes, have been abandoned.

Premier Bruce, of Australia, has announced that his government was considering a plan to reduce ocean fares for immigrants.

Buried beneath an avalanche of sand, which he was clearing away, Robert Maitland met death by suffocation at a lumber mill in Vancouver.

Edward Noble, prominent British Columbia Orangeman, who walked in a parade there last July when he was 29 years old, died on Feb. 21 at Cedar Cottage, a suburb.

A resolution calling for the abolition of the stamp tax was unanimously carried during the third and final session of the Retail Lumber Dealers' Association of the province of Quebec, attended by some 275 members.

France intends to give the Syrian people a form of government resembling that given to Iraq by the British. Count Robert de Caumont, French delegate to the League of Nations.

Hon. H. W. Newlands, K.C., has been appointed Lieutenant Governor of Saskatchewan. Mr. Newlands has been Lieutenant-Governor of the province since February, 1921, when he succeeded Sir Richard Lake.

The present serious industrial crisis in Germany is forcing many firms to restrict their operations considerably, and the number of unemployed in the Ruhr district, especially, is increasing daily.

A British government air service for passengers, mail and freight, between Cairo, Egypt, Burma and possibly Australia, is in the making, according to Maj-General Sir John W. Bracken, director of civil aviation in the British air ministry.

Right Hon. W. L. Mackenzie King, Prime Minister of Canada, has been officially declared elected as a member of the House of Commons for the federal constituency of Prince Albert. Driftlessly uniformed dignitaries and officials paid their respects to the King at the first levee of the session, held in St. James' Palace recently.

Political Trickery
Hence To Democracy

Sir Arthur Currie Says Present-Day Politicians Suffer in Comparison to Lincoln

Abraham Lincoln was a man whom Canadian politicians would do well to emulate, said Sir Arthur Currie, G.C.M.G., principal of McGill University and former commander of the Canadian corps, in an address at Montreal. While Sir John A. Macdonald bowed to the Conservatives, and Sir Wilfrid Laurier to the Liberals, the great United States commander bent the knee to no party, political, moral or social.

Sir Arthur contrasted Lincoln with men of lesser qualities. "The polit that nation," he said, "appeals to the passions of the crowd in order to get votes. He often sets out against west, east against east, and class against class. This political trickery, for it cannot be called strategy, is the danger of democracy."

Canada and the Locarno Treaty

No Action Necessary to Remain Outside Terms of Pact

Renowned government action to disassociate Canada from the Locarno Treaty is officially denied. No action is necessary on the part of the Dominion to remain outside the terms of the treaty, as it expressly provides that the treaty shall not apply to the British Dominions unless they definitely accept it.

It is probable the government will make some announcement in the House respecting Canada's attitude.

Early in the present session, Hon. Ernest Lapointe, government leader in the House, said in reply to Mr. Michener, that "no step will be taken by the government before parliament had been consulted in the matter." He added that "our intention is certainly to have the matter discussed in parliament."

Honor Belongs To Canada

The first steamboat to cross the Atlantic Ocean was the Royal Weymouth, built in Canada in 1831. The honor of this achievement belongs to the Dominion. It was also the first trans-Atlantic boat built of iron. A tablet commemorating the historic event is in the Parliament Buildings at Ottawa.

Sunday School Teacher—"Some little boys are good and some are bad. What kind go to heaven?" Small Answer—"Dead ones!"

W. N. U. 1618

C.N.R. To Build Branch Lines

Heavy Expenditure To Be Made This Year On Branch Lines in the West

The Canadian National Railway contemplates an expenditure of \$5,396,000 in 1926 on branch lines. This is the estimate brought down by the government and tabled in the House of Commons. Between 15 and 20 branches throughout the Dominion remain incomplete. On seven of these tracks will be laid during 1926.

The largest expenditure will be on the Turfville-Sask. branch, on which about 4 miles of track will be laid and \$1,710,000 expended. A million dollars will be spent on the Danbune-Central Butte, Sask. branch, and \$915,000 will be spent on the Rosedale-Sask. branch, which will be practically completed this year. At least two other branches will be practically completed this year, the St. Paul-R. Alta, and the Acadia Valley branches, on each of which about half a million dollars will be expended. A total of 163 miles of track will be laid on branch lines this year, under present plans. The only two branches on which no work at all will be done are Kingston-Vancouver, N.B., and the Grand Prairie, Que.

Last year \$4,322,650 was spent on branch lines, says the statement from the railway department. These figures are, however, incomplete, and a final statement on last year's branch line construction is still to come. The three chief expenditures last year were: \$2,866,000 on the Kamloops-Selkirk, B.C. line; \$1,252,000 on the Danbune-Central Butte, Sask. line; and \$1,095,000 on the Hann-Wanawana, Alta. line.

For Cheaper Money

Western Men Launch Drive For Six Per Cent. Long Term Loans

Western men, Liberals and Progressives, are launching a drive for six per cent. long term bonds under the Rural Credits Act to be brought in by the government.

Negotiations hitherto have disclosed that the opinion of the experts consulted has been that the farmers will have to pay 7 per cent. It is the general view, that, unless absolutely essential, the government should not guarantee the bonds at the rural credit organization; and that, contrary to the opinion of the United States, these bonds should not be tax-free.

Without a government guarantee

the rural credit bonds according to experts consulted, would have to bear interest at 5 1/2 per cent. In order to charge the farmer 7 per cent., as at least one per cent. will be required for administration.

With a government guarantee, the bonds could be marketed at less than 5 per cent. interest, which, after providing for administration, would give the farmer money at 4 per cent.

Most of the westerners claim that 6 per cent. money is essential, and Progressives who dislike the government guarantee feature, claim that it is more than 6 per cent. for the money.

Says Brain Never Tires

Cannot Be Overtaxed By Work Or Study, Opinion of Scientists

The brain of the ordinary citizen, provided he takes to language study, is capable of holding any number of different vocabularies," Sir Denison Ross, famous surgeon-scientist, told the School of Oriental Studies, thus joining the select band of scientists who decline to admit that the brain can be overtaxed by work, reading or study.

Just previously, Sir Arthur Keith, Dublin's leading anthropologist, had declared the idea that brain power was ever caused by overwork or study, and Keith even contended that brain work never tires; it is physical exertion or disuse, perhaps due to unhygienic feeding and neglect of the body white concentrating on study, that results in the total collapse which are commonly put under "brain fever" or "overwork."

Denying the name theory, Dr. Denison Ross argued that brain power, though on somewhat different lines, Sir Denison Ross argued that brain power is not so much a matter of quantity as of quality, and that the brain can be overtaxed by work, reading or study.

Aeroplane Oil From Crickets

One of the United States consular agents in Algiers reports the discovery there of an oil extracted from crickets that is very suitable for aeroplanes, since it does not congeal even at high altitudes. "Hence 15 tons of crickets were shipped from Algiers to Holland to be used in extracting this oil. Crickets also are collected in great numbers and are used as an chicken feed in other parts of the world."

Britain Discards Helicopter

Will Concentrate On Autogiro Type Which Is Much Simpler

The Brennan helicopter experiments, on which \$250,000 have been expended to date, will be discarded by the air ministry in favor of concentration on the Jacquerie autogiro. It is understood that the ministry is eradicating the intention of constructing four or five machines embodying the principles of the Jacquerie autogiro. This was halted by Sir William Branker, Air Vice-Marshal when it was tried out at Farnborough which "the greatest aeronautical invention since the Wrights flew."

Experiments with the helicopter have been carried out in the closest secrecy for the last five years, but experts are now said to have come to the conclusion that the autogiro type achieves all that the perfected helicopter would have been able to do, while its principles are much simpler.

Russia Competing For U. S. Trade

Preparing to Export Many Commodities During Next Six Months

Officials of the commissariat of agriculture say that Russia is preparing to export to the United States during the next six months, six billion 500,000 pounds of wheat, 40,000,000 chickens, ducks, turkeys and wild fowl.

The United States, officials say, will also be able to absorb about seven million dollars worth of sausage casings, \$10,000,000 worth of wool for carpets, 100,000 head of animal bones for sugar refining purposes.

Declaring that these commodities are now being purchased by the United States in England and elsewhere, they urge Russian producers to compete for this trade.

ON THE AIR

What Is Doing in the World of Radio

G. E. Shaw says radio is doing service to theatres by training artists to perform without applause. Reception of a radio programme from Johannesburg, South Africa, on a three-set set at London, Ohio, recently has been verified.

The aurores borealis is being blamed by experts for unsatisfactory radio reception. There are now more reasons why the radio will not reach than why it should.—Hamilton Spectator.

An ordinary street light in an English town has the peculiar property of acting as a radio and every day the broadcast radio programmes. The postman stops on his rounds to listen to a programme.

A college which will broadcast all of its lectures and instructions has been inaugurated at Vienna, Austria. The daily courses will start at 10 p.m. and will last approximately two hours.

Rough usage harms many radio tubes, and causes the tubes to produce a new set before they need them. Handling tubes, taking them out of the sockets and such often ruins them.

Five thousand dollars' damage was done at the Montreal radio station CKAC when a mouse curled with a wire, started a short circuit and blew out 14 fuses. The night's programme was abruptly terminated. The mouse was charged back.

Wireless telephones communication with Australia, a distance of 12,000 miles, has been established by Frank Noll, an amateur of Whitehead, near Dublin, Ireland. He listened 15 minutes and the voice of a Melbourne citizen named Howden could be distinctly heard. The wave length used was 35 metres.

Eskimos Fight To Save Coal

Dragged Heavy Barge to Safety When Storm Broke

A desperate fight by Eskimos to save a barge's supply of coal from the elements has been reported by Dr. W. A. Newhall, pastor of three missions in the vicinity of Point Barrow, north-eastern Alaska.

The fuel had been loaded on the barge from a supply ship when a storm, described as the worst in years,

had blown across the coast and had hit the barge before it.

The rising sea soon was lapping against the man-made pile of sacked coal.

Wildly waving for suggestions or orders, the adults, men and children, led to work moving the coal to safety. For hours, until well past midnight, the labor continued. The men carried the sacks on their backs, while the women and children squatted and dragged them through the shifting sand until more than a hundred tons of coal had been placed out of reach of the waves.

Disease Decimates Indians

Trappers in Far North Are Victims of Epidemic

A total death list of 12 Indian trappers at Port Hood, on the lower McKenzie River, from an epidemic, the exact cause of which remains unknown, is contained in news received by L. Romanet, manager of the Athabasca and McKenzie districts of the Hudson's Bay Company, by the recent mail from the far north.

Indications of this sickness were noticed in the fall, and its continuance was the only hope against a large number of fatalities has resulted in a demoralization of the fur trade at that point during the earlier part of the winter.

French Women Patriotic

Offer Wedding Rings To Be Made Into Gold Francs

Thirty-seven women in a St. Denis atelier have offered to help solve France's financial troubles. "If a lot of gold francs could be struck no doubt French money would improve," they wrote the editor of *l'Humanite* newspaper's financial troubles. "If a lot of gold francs could be struck no doubt French money would improve," they wrote the editor of *l'Humanite* newspaper's financial troubles. "If a lot of gold francs could be struck no doubt French money would improve," they wrote the editor of *l'Humanite* newspaper's financial troubles.

First Recorded Eclipse

Eclipses were predicted by an Athenian, named Callippus, in the year 336 B.C. The first eclipse was predicted by a Greek astronomer named Ptolemy, according to Ptolemy. It was an eclipse of the moon, and was observed with accuracy at Babylon in Mesopotamia.

GARDINER TO BE SASKATCHEWAN'S NEW PREMIER

Regina.—Hon. J. G. Gardiner, minister of highways and minister in charge of the bureau of labor and industries, was the unanimous choice as successor to Hon. C. A. Dunning at a meeting here of 1,200 Liberals in the City Hall.

The meeting was made up of sixty members of the legislature or candidates at the June elections, as well as the presidents, vice-presidents and secretaries of the constituency Liberal Associations.

Mr. Gardiner's name was placed in nomination by Hon. C. M. Hamilton, minister of agriculture, who revealed that four ministers had been nominated at the afternoon conference of members of the legislature and candidates at the June elections: Hon. A. P. McNab, minister of public works and "father" of the government; Hon. J. C. Latta, minister of education; Hon. J. C. Gardiner, minister of highways, and his own. It had been decided unanimously to place only one name before the convention.

Other nominations were called for and Mr. Hamilton, Mr. Latta, Mr. McNab and others addressed the convention before nominations were closed and Mr. Gardiner was again chosen leader of the government until the general election.

The chairman explained the purpose of the convention was to select a successor to Premier Dunning. While all regretted that he was leaving Saskatchewan, they were glad that he had been honored by being selected as the new minister of railways. He was sure Mr. Dunning would not forget Saskatchewan and that in him the province would have a champion at Ottawa.

When Premier Dunning was called upon, the huge audience rose en masse, welcoming him with rapt and after round of deafening applause.

Four years ago, said Mr. Dunning, the Liberals of Saskatchewan gave him a trust and he was glad to be able to say that no man ever had more loyal support than he had enjoyed. One of his most precious memories would be that he had been so honored that his name would be associated with the names of Hon. Walter Scott and Hon. William Melville Martin in the history of the province.

Shut Out Canadian Butter

United States to Raise Tariff is the Prediction

Washington.—A prediction that President Coolidge is soon to issue a proclamation under the flexible tariff law increasing the tariff on butter fifty per cent, was made by Minnesota members of the house, Canadian butter imports would be reduced to a negligible amount by the increase should it materialize.

The interest of the Minnesota members came on the heels of the announcement that the tariff commission has completed its butter investigation and delivered its report to the Senate. The committee of the report could not be learned.

Trans-Canada Starts May 16

Moose Jaw.—The Trans-Canada Limited, the fastest transcontinental train on the American continent, which is operated every year by the Canadian Pacific Railway Company from Montreal to Vancouver, will be inaugurated on Sunday, May 16, starting from Vancouver, Toronto and Montreal. The train this year will be operated on practically the same schedule as in the past year.

Letters By Sligh

Casperhead, Montana.—Owing to the roads being blocked by snow the mails to this town are being conveyed by a horse-drawn sleigh over the field, and in other quarters are being conveyed by men on horseback. Several acres on the Scottish borders have been cut off by snow, and sheep farmers have suffered serious losses.

Manitoba Debates About to Close

Winnipeg.—The debate on the address in reply to the speech from the throne came to an unexpected end in the Manitoba Legislature after 23 days of debate. Quietly and without ceremony the house passed the customary motion that the speech be engrossed and presented to the Hon. anti-governor.

Hops To Resume Debt Payoffs

London.—Winston Churchill, minister of the exchequer, stated in the House of Commons that M. Doumer, French minister of finance, expressed hope that he would be able to come to London soon for the resumption of debt negotiations.

Premier of Saskatchewan

Plane Caught in Wireless Apparatus

Paris.—An attempt to fly through the opening of the Eiffel Tower proved fatal.

The aeroplane, caught in wireless apparatus, crashed in flames and the aviator burned to death.

The tier, Lieut. Leon Collet, had passed through the arch when he heard the radio wires. He made a despairing attempt to bring the machine under control, but it fell and burst into flames.

Lieut. Collet's brother witnessed the accident. He said the lieutenant attempted the feat after a wager with a friend.

HON. J. G. GARDINER

Progress Is Made On Alberta Highways

Government Ready To Proceed With Farm Loan Measure

Edmonton.—The debate on the address from the throne has given members of the legislature an opportunity to explain the work of their departments.

Hon. Alex. Ross, minister of public works, explained the progress that has been made in the construction of main highways throughout the province. 500 miles of main highways have been built according to the specification required to raise the Dominion Government grant to forty per cent, of the cost and 240 miles have been graded.

The department expects this year to do more work than has been graded. The department expects that by the end of the summer they expect that a main highway from Athabasca on the north to the international boundary on the south will have been completed, and also a highway from Edmonton to Peace River. A motor road will also be completed from Regina to Jasper National Park. At present the road is twenty-five miles from Jasper and should reach Jasper this summer.

The progress made in road construction had attracted many tourists this summer. 22,000 having travelled at the cost paid by the National Park during 1925.

Hon. R. C. Reid, provincial treasurer, introduced the house that the municipal districts throughout the province were in very good financial shape. During the year only forty had borrowed from the banks, and at the end of the year only 29 were owing the banks anything.

A Liberal member had charged that the hotels of the province were cluttered up with government inspectors, but that was the case, said Mr. Reid, during the Liberal regime they must have been parked outside, for at the present time there were only 105, as compared with 128 in 1924. 8000 were down \$25,000, and travelling expense \$125,000.

The government were ready to get along with their farm loan measure as soon as a bill was introduced in the Dominion house. They took the position that the loan of money to farm loans was the business of the Dominion Government, but the province was co-operating, and had appointed a special committee, which had collected a mass of evidence during the past few months, which would be of great value.

The criticism of the Liberal members has been largely on the charge of premeditation from Greenfield to Broomeville, and on the charge that the present government is a class one, being dominated by the U.F.A.

On the government side, members have stressed strongly the desire to co-operation between cities and rural areas.

Suspend Proposed Increase in Rates

Plan to Raise Rate on Stockers and Feeders by Fifty Per Cent.

Ottawa.—Suspension of the proposed fifty per cent. increase rate on stockers and feeders in the western provinces, was ordered by the board of railway commissioners.

The increase, which it was proposed by the railway to put into effect on March 1, would apply to rates on stockers and feeders from primary markets such as Winnipeg, Moose Jaw, Calgary and Edmonton to stations in Manitoba, Saskatchewan and Alberta.

It is probable that the rate will be considered at the time of the hearing in Regina on the general rates inquiry. No date for this sliding has been decided upon, but it will probably take place within the next two months.

The application for suspension was made by W. H. McEwen, counsel for the province of Saskatchewan.

Rome.—Indications that the Vatican will take a stand against crime news in the daily papers, in the same way that it has opposed immorality in drama, are contained in the *Avvenire*, the official organ of the Vatican.

Aviator Killed In Paris

Plane Caught in Wireless Apparatus

Paris.—An attempt to fly through the opening of the Eiffel Tower proved fatal.

The aeroplane, caught in wireless apparatus, crashed in flames and the aviator burned to death.

The tier, Lieut. Leon Collet, had passed through the arch when he heard the radio wires. He made a despairing attempt to bring the machine under control, but it fell and burst into flames.

Lieut. Collet's brother witnessed the accident. He said the lieutenant attempted the feat after a wager with a friend.

Will Discuss Peace On Pacific

Canada and United States Invited to Meeting in Honolulu

Honolulu.—The Australian Labor party has issued a call for a meeting in Honolulu in November for all Pacific nations, including Canada and the United States, to discuss the possibility of a better understanding in respect to the future peace on the Pacific.

This information was contained in a message from L. B. McNamara, secretary of the Labor party, to A. H. Ford, director of the Pan-Pacific Union, here.

More than 100 delegates, including representatives of the Soviet, are expected, McNamara said.

He added it was intended to bring together the representatives of labor and other organizations from countries bordering on the Pacific.

SOME MANITOBA CABINET CHANGES ARE IN PROSPECT

Winnipeg.—Many changes in the cabinet of Hon. John Bracken, premier of Manitoba, are pending, according to reports in legislative circles.

It is stated that a complete reorganization of the cabinet will be undertaken by the premier in the near future, including a general shuffling of the positions of several of the ministers. Since the resignation of Hon. P. M. Wallace as provincial treasurer, Premier Bracken has seen the possibility of a cabinet change.

It is reported that Hon. W. R. Clubb, minister of public works, is being considered for the position of provincial treasurer, while Hon. J. C. Latta, minister of education, is being considered for the position of minister of public works.

It is also reported that Hon. J. C. Latta, minister of education, is being considered for the position of provincial treasurer, while Hon. W. R. Clubb, minister of public works, is being considered for the position of minister of education.

THE CROW'S NEST RATE PROBLEMS AGAIN TO FORE

Ottawa.—The Crow's Nest Pass problem is again in the hands of the board of railway commissioners.

The order issued last September extending the rates to westbound grain has resulted in three separate appeals to the board for further limitation. The first of these was settled last month, when by an equal division among the commissioners the September order was continued in force.

The board closed a week's sitting on the other two appeals, in which judgment has been reserved. These two last cases were parts of an effort by the provinces of Manitoba, Alberta and Saskatchewan to get a further reduction in the rates put in force by the railways under the September order. These provinces first claimed that the existing rates on grain and flour are above the Crow's Nest basic as interpreted by the act passed last June. They asked that the railroads be required to reduce in accordance with this claim, and then used as a basis for making westward rates.

The second effort of the three provinces to get the westbound rates reduced was an application for a direction to the Canadian Pacific Railway to discontinue the differential of 124 miles, used in making its rates east of Toronto. The rates, in effect, were made by the railways on the basis of the Canadian National mileage from Edmonton to Vancouver, which is 124 miles greater than that from Calgary to Vancouver.

The three westernmost provinces claimed that the railroads had not right to use this differential or constructive mileage; and asked that it be discontinued. On their issue the board reserved judgment.

Scales Mountain In Blinding Snowstorm

Highest Peak in South Africa Conquered by Cape Town Climbers

Cape Town.—Kilimanjaro, the highest mountain in Africa, has been conquered in a blinding snowstorm, after the second attempt within a month by G. Lomax, the noted Cape Town climber.

Mr. Lomax said that he set out with two natives at the beginning of November. He climbed nearly 20,000 feet in four days. He slept one night in a crater of the Kilimanjaro wilderness with a jagged rock of twisted lava.

He pointed out a mistake which had been made by previous climbers. They imagined that the crater was the top of the mountain, but that it was not. The real test lies in the 600 feet to the top of the mountain, which was reached by two Germans who, in 1914, reached the highest point.

It is an American cloth-covered exercise book containing verses of poetry. There followed the names of the two climbers, Carl von Sall and Walter von Sall, dated February 12, 1914.

CUSTOMS PROBE HEARS OF CASES OF SMUGGLING

Ottawa.—Ministers who have been at the head of the customs department during the last few years have not always taken "the action must in the public interest," though they have not done anything they had not a legal right to do, in the opinion of Mr. J. Sparks, of the Commercial Protective Association, witness at the customs probe.

The ministers referred to were Senator Jacques Bureau and Hon. P. J. A. Carlin. Mr. Sparks was being questioned by Hon. G. H. Bédard, minister of customs, as to his opinion of the integrity of the administration of the department. Some of the officials "might be more efficient," added Mr. Sparks, but he knew of no cases of personal malice or dishonesty.

According to the report of Rock Island, Quebec, Mr. Sparks said that officers there knew that smuggling was going on and that some of them had winked at it. He said that the department could make better distribution of officers if it had not to get the permission of the civil service commission to move a man from one locality, where he had got to know everybody, to another.

Mr. Sparks said that "stimulation by politicians" of customs officers, who were often afraid to reveal facts that had come to their knowledge lest they should be considered as having been influenced at Ottawa against them. "That is irrespective of what government is in power," remarked Mr. Sparks.

Financial Plight Of Soviets Is Revealed

Situation in Russia Not So Rosy As Depicted

Winnipeg.—While more than 100 foreign delegates are taking part in the session of the executive committee of the communist international at Moscow, the same Soviet papers that are printing their optimistic predictions of the downfall of capitalist America are revealing the financial plight of the Soviet Union. It is impossible to duplicate in the history of international trade.

The delegates are unable to realize the situation in Russia is not so rosy as is depicted by the Soviet writers. Because the finance commission has already slashed the budget of the government by fifty per cent, with an additional cut promised before the end of the conference.

The shortage of manufactured goods throughout Russia is felt more by the population than in the early days of the revolution. There is a shortage of many of the necessities of life, and the people are selling their possessions to buy bread.

Sweat Pads!

Heavy buyings of the above at bargain prices enables me to offer the farmers of the Champion District Sweat Pads at unprecedented prices:

100 Per Cent Deer Hair, per doz. \$12.00
Brown and White, per doz. 7.60

These are regular lines made by Tapatco and other reliable firms.

Compare these prices with the mail order catalogues and convince yourself.

These pads are sold for strictly cash and are available until 13 inst. only, in doz. and one half doz. lots.

F. J. CLAPP, - Champion.
